ABOUT THE DEPARTMENT

The Department of Civil Engineering was started in the year 2002 with the state of art infrastructural facilities right from its inception. It is continuously thriving to impart quality education and competitive spirit among students for academic excellence. The Department has made significant progress within a few years. The objective of the Department is developing logical thinking through problem-solving among the students and training the students in the latest technologies as per industrial needs. The Department contains efficient and eminent faculty & senior faculty.

COURSE OBJECTIVES

- To understand people's needs at home as well as workplace.
- To develop processes and structures for social sustainability.
- To understand the impacts of corporationon people and society.

COURSE OUTCOMES

At the end of the course the students will be able to

- Understand the basics of social sustainability and implement them in real life situations.
- Understand how sustainability has social impact on business, industries and various corporations.
- Implement social sustainability to improve employment opportunities for freshers in various industries.
- Help in transforming the society and people at workplace for better sustainable goals.

COURSE CONTENTS

Topics	Number of Hours required
Introduction to Social Sustainability	6
Social sustainability process	6
Social sustainability in business	6
Social sustainability dimensions or issues	6
Social sustainability improving Employment Opportunities	6
Total Hours	30

ABOUT THE DEPARTMENT

The Department of Electronics and Communication Engineering was started in the year 2002 with the state of art infrastructural facilities right from its inception. It is continuously thriving to impart quality education and competitive spirit among students for academic excellence. The Department has made significant progress within a few years. The objective of the Department is developing logical thinking through problem-solving among the students and training the students in the latest technologies as per industrial needs. The Department contains efficient and eminent faculty & senior faculty

COURSE OBJECTIVES

After completion of the course, students will be able

- Learn fundamental principles of HSE and gain an understanding of the importance of health, safety and welfare standards in the workplace.
- Learn the roles and responsibilities for HSE in the workplace and become aware of the main causes and effects of poor health and safety at work

COURSE OUTCOMES

At the end of the course the students will be able to
- Gain an understanding of the causes of injuries and ill health, reasons why accidents occur, effects of accidents and how to report accidents and near misses.
- Learn the common terminologies in HSE including, Hazards, Risks, Near Misses, Incidents, etc

COURSE CONTENTS

Topics to be covered	Number of Hours required
Occupational Safety and Health, Safety Paradigms	6
OSH Principles. Basic Definitions	6
Overview of Risk Assessment Hierarchy of Controls	6
Safety Regulations	6
OSH Roles and Responsibilities	6
Total Hours	30

The objective of the Department is developing logical thinking through problem-solving among the students and training the students in the latest technologies as per industrial needs. The Department contains efficient and eminent faculty & senior faculty

COURSE OBJECTIVES

After completion of the course, students will be able

- The objective of this course is to get on broader understandings on various aspects of solid waste management (starting from its generation to processing with options for reuse and recycle, transport, and disposal) practiced in different municipalities.
- To reduce the waste management is to reduce the dangerous effects of such waste on the environment and human health

COURSE OUTCOMES

At the end of the course the students will be able to

- Learn basic concepts of solid waste management, beginning from source generation to waste disposal in a system of municipality organizational structure
- Various elements of Waste Management Process
- Identify Methods used to quantify solid waste management.
- Plan the waste minimization and design, storage, collection, transport, processing and disposal of municipal solid waste.

COURSE CONTENTS

Topics to be covered	Number of Hours required
Basics of Waste and its types, waste management Process, principles of effective waste Management, types of waste management inspections.	7
Environmental Management, Waste Generation Concepts & Environmental Impact Assessment (EIA)	8
Key sources of waste in the building Industry and strategies to reduce, reuse, and recycle these waste streams.	7
Role of Workplace Inspection in Waste Management, Special Wastes Management	8
Total Hours	30

The objective of the Department is developing the logical thinking through problem solving among the students and training the students in latest technologies as per the industrial needs. The Department contains efficient and eminent faculty & senior faculty.

COURSE OBJECTIVES

After completion of the course, students will be able

- To raise students' general awareness of ethical dilemmas at work
- To enable students to develop their own, considered judgments about issues in business ethic
- To investigate whether ethics sets any boundaries on competition, marketing, sales, and advertising

COURSE OUTCOMES

At the end of the course the students will be able to

- Recognize organizational challenges to ethical behaviour.
- Recognize the inherent conflict of interest in many business decisions.
- apply moral reasoning to specific situations and defend the conclusions of that reasoning
- Develop strategies for identifying and dealing with typical ethical issues, both personal and organizational.

Assessment: The students are entitled to receive the certificates after completion of this course with the minimum 50% of marks in the assessment

COURSE CONTENTS

Topics to be covered	No.of hours required
Perspectives on business ethics and values, Ethical issues in business, Ethical theories and how to use them, Personal values in the workplace	8
Values and ethical thinking, Individual responses to ethical situations, Corporate responsibility and corporate citizenship	8
Ethics in the marketplace, Social responsibility and the environment, Corporate models for ethical decision-making, Sustainability and the responsible corporation	8

ABOUT THE DEPARTMENT

The Department of Electronics and Computer Engineering (ECM) aims to integrate two separate engineering fields to meet the joint demands made by the electronics and computer industries in today's world. This Programme combines coursework in different aspects of both fields over four years, with an emphasis on the design of computing systems. Electronics and computers, and their joint applications, are playing an ever-increasing role in our lives as Information Communications Technology (ICT), with everything from consumer goods to space shuttles using electronic hardware (circuits) and computer software integrated together. Students can avail the expert knowledge in electronics as well as Computer Science.

COURSE OBJECTIVES

After completion of the course, students will be able:
- To manage financial risks stemming from climate change, resource depletion, and environmental degradation.
- To foster greater transparency and long-termism in financial and economic activity in order to achieve sustainable and inclusive growth.

COURSE OUTCOMES

At the end of the course the students will be able to
- Define sustainability and identify major sustainability challenges
- Learn the principles of sustainable finance
- Understand the importance of a long-term perspective
- Understand the role of finance in the transition to a sustainable economy
-

Assessment: The students will get the certificates after completion of this course with the minimum 50% of marks in the assessment test.

ABOUT THE DEPARTMENT

The Department of Electronics and Computer Engineering (ECM) aims to integrate two separate engineering fields to meet the joint demands made by the electronics and computer industries in today's world. This Program combines course work in different aspects of both fields over four years, with an emphasis on the design of computing systems. The increased use of ICT in every aspect of our lives ensures the continued relevance of this a Department of ECM has the expert faculty from both electronics background and Computer Science background. Students can avail the expert knowledge in electronics as well as Computer Science.

COURSE OBJECTIVES

After completion of the course, students will be able:
- Leaders should prioritize making ethical decisions that consider the well-being and interests of all stakeholders involved.
- Leaders should establish ethical governance mechanisms within their organizations.
- Leaders should hold themselves accountable for their actions and decisions.

COURSE OUTCOMES

At the end of the course the students will able to
- Articulate six values that contribute to ethical leadership
- Demonstrate respectful treatment of others in an organizational context
- Demonstrate an individual work ethic that encompasses completing tasks consistently, accurately, and with exceptional effort
- Apply organizational norms and rules fairly without showing favoritism

Assessment: The students are entitled to receive the certificates after completion of this course with the minimum50% of marks in the assessmet test.

ABOUT THE DEPARTMENT

The Department of Electronics and Computer Engineering (ECM) aims to integrate two separate engineering fields to meet the joint demands made by the electronics and computer industries in today's world. This Programme combines coursework in different aspects of both fields over four years, with an emphasis on the design of computing systems. Electronics and computers, and their joint applications, are playing an ever-increasing role in our lives as Information Communications Technology (ICT), with everything from consumer goods to space shuttles using electronic hardware (circuits) and computer software integrated together. Students can avail the expert knowledge in electronics as well as Computer Science.

COURSE OBJECTIVES

After completion of the course, students will be able:
- To learn the values and implement in their careers to become a good managers.
- To develop various corporate social Responsibilities and practice in their professional life
- To imbibe the ethical issues in corporate governance and to adhere to the ethical codes.

COURSE OUTCOMES

At the end of the course the students will be able to
- Ethically positive, honest, hardworking, and driven by principles of fairness and decency in the workplace
- Increases the overall morale and enhances the performance of an organization.
- A company that has established behavioral policies can improve its reputation and help ensure its long-term success.

Assessment: The students will get the certificates after completion of this course with the minimum 50% of marks in the assessment test.

ABOUT THE DEPARTMENT

The Department of Artificial Intelligence and Data Science was started in the year 2020 with the state of art infrastructural facilities right from its inception. It is continuously thriving to impart quality education and competitive spirit among students for academic excellence.

The Department has made a significant progress within few years. The objective of the Department is developing the logical thinking through problem solving among the students and training the students in latest technologies as per the industrial needs. The Department contains efficient and eminent & senior faculty.

COURSE OBJECTIVES

- The purpose of this course is to create awareness among B. Tech students about environmental studies.
- It is evident that the with the current rate of carbon dioxide release in the atmosphere there would not only be the increase in the global temperature.
- It will also cause rise in sea, level and increase the frequency of disasters.

COURSE OUTCOMES

On completion of the course the student should be able to understand the Global warming threatens the planet in a new and unexpected way –

- By triggering earthquakes
- tsunamis
- avalanches
- volcanic eruptions.

COURSE CONTENTS

Topic	Hours
Introduction and Global warming primarily caused	6
Global warming issues	6
Observed changes in sea level, Physical impacts of climate change	6
Expected to confirm link between climate change and extreme weather	6
Global warming impacts of climate change	6

About the Institute

Vignan's Institute of Information Technology (Autonomous) goal is to be a recognized leader in technical education to be a competent and socially conscious technical workforce for industry needs and national growth. Provide top-tier education and research opportunities in the cut-edge fields of engineering and technology, with a strong emphasis on skills, leadership, and creativity. Students get the opportunity to meet industry professionals through guest lectures, visits to enterprises, internships, sports, cultural, and other extracurricular activities, and guest speakers. VIIT has a best track record of placements in recent years, and students have established their mettle in industry, academics, and administration. A well-ventilated green campus, well-ventilated room classrooms, a state-of-the-art computer centre, a digital library, and a peaceful environment contribute to a pleasant learning experience.

About the Department

The institution started offering MBA course from 2006-07, the three aims of the institute are - To enable students to tap their innate potential to bloom into business leaders, To equip the students with skills required to develop themselves into managers and to provide the impetus to reach the higher echelons of the organization and to offer a wide spectrum of business knowledge, conceptual and analytical skills to develop the students into competent and effective managers. the course lays emphasis on innovative pedagogy which include industry internships, live projects, Business games, Case studies, interaction with experts seminars etc.

Course Description and Objectives

To acquaint students with

- This course is an introduction to the theories and practices of ethical leadership, with a focus on organisations.
- This will learn to recognise the role of ethics in organisational decision-making, analyse the actions of leaders from an ethical perspective, and apply ethical frameworks to your own leadership practices.

Course Outcomes

At the end of the course the studentswill able to

- Be able to use multiple leadership concepts to understand leadership situations and enhance your effectiveness in the leadership process.
- Enhance your ability to think critically, to analyze complex and diverse concepts, and to use your reasoning, judgment and imagination to create new possibilities in leadership situations.

Introduction to Human Values

05.11.20 – 16.11.20

ORGANIZED BY

DEPARTMENT OF MASTER OF COMPUTER APPLICATIONS

57

ABOUT THE DEPARTMENT

The department of MCA at Vignan's IIT has been active in teaching and research since its inception in 2006. Currently, about 8 committed faculty members are working in the department. The department of MCA offers two years post graduate programme in Master of Computer Applications. VIIT's goal is to become a world class engineering institute in a multi-campus setting. It is one of the best institutions in the state. In respect to that, the department of MCA provides a better guidance to all students with practical knowledge and skills. This is an important aspect for the current requirement, under the new concept of outcome based education. Here the students are trained to work as a team and strive for excellence. The course will not only groom the students to become world class engineering graduates, but will also nurture their sense of purpose and vision.

COURSE OBJECTIVES

After completion of the course, students will be able.
- To create an awareness on ethics and human values.
- To instill moral and social values and loyalty.
- To create awareness on assessment of safety and risk.
- To appreciate the rights of others.

COURSE OUTCOMES

At the end of the course the students will be able to
- Identify and analyze an ethical issue in the subject matter under investigation or in a relevant.
- Identify ethical concerns in research and intellectual contexts, including academic integrity, use and citation of sources, the objective presentation of data, and the treatment of human
- Identify the multiple ethical interests at stake in a real-world situation or practice.

COURSE CONTENTS

ABOUT THE INSTITUTION

Vignan's Institute of Information Technology (VIIT) was established in 2002 in the city of destiny, Vishakhapatnam, to cater to the educational needs of the general public. It acquired Autonomous status in the year 2017 and NBA and NAAC accredited Institute. The experience guided by Vignan's through its earlier institutions at Guntur has only helped in establishing very high-quality standards right from the inception and also is one of the reasons for the success.

ABOUT THE DEPARTMENT

The department of MCA at Vignan's IIT has been active in teaching and research since its inception in 2006. Currently, about 8 committed faculty members are working in the department. The department of MCA offers two years post graduate programme in Master of Computer Applications. VIIT's goals is to become a world class engineering institute in a multi-campus setting. It is one of the best institutions in the state. In respect to that, the department of MCA provides a better guidance to all students with practical knowledge and skills. This is an important aspect for the current requirement, under the new concept of outcome based education. Here the students are trained to work as a team and strive for excellence. The course will not only groom the students to become world class engineering graduates, but will also nurture their sense of purpose and vision.

COURSE OBJECTIVES

After completion of the course, students will be able.
- To create an awareness on ethics and human values.
- To instill moral and social values and loyalty.
- To create awareness on assessment of safety and risk.
- To appreciate the rights of others.

COURSE OUTCOMES

At the end of the course the students will be able to
- Identify and analyze an ethical issue in the subject matter under investigation or in a relevant.
- Identify ethical concerns in research and intellectual contexts, including academic integrity, use and citation of sources, the objective presentation of data, and the treatment of human
- Identify the multiple ethical interests at stake in a real-world situation or practice.

GENDER SENSITIZATION

5th March 2021 to 16th March 2021

ORGANIZED BY
DEPARTMENT OF BASICS SCIENCES AND HUMANITIES

65

ABOUT THE DEPARTMENT

Department of Basic Sciences and Humanities is recognized as one of the ten departments in the institution. It is a combination of multiple subjects and streams like Physics, Mathematics, Chemistry, Environmental Studies and English. It oversees the academic activities of I-B.Tech and bridges the gap between intermediate and engineering courses.

The department has a privilege, to transform the students, who are from diverse background into better individuals to cope with the global requirements

COURSE OBJECTIVES

- To develop students sensibility with regard to issues of gender in contemporary India.
- To provide a critical perspective on the socialization of men and women.
- To introduce students to information about some key biological aspects of genders.
- To expose the students to debates on the politics and economics of work.

COURSE OUTCOMES

- The students will be able to:
- Students will have developed a better understanding of important issues related to gender in contemporary India.
- Students will acquire insight into the gendered division of labour and its relation to politics and economics.
- Men and women students and professionals will be better equipped to work and live together as equals.
- Students will be sensitized to basic dimensions of the biological, sociological, psychological and legal aspects of gender
