ABOUT DIET

Dadi Institute of Engineering & Technology (DIET) is a self financing Engineering College Established in 2006. It is sponsored by The Sarada Educational Trust which is established by academicians, former minister and opposition leader of the State Legislative Council of Andhra Pradesh Sri Dadi Veerabhadra Rao. His sole objective is to empower the rural youth with high quality cutting edge technical education for the development of the region and subsequently the Nation. The college is making greater strides in the field of technical education and has emerged as preferred institute under Jawaharlal Nehru Technological University Kakinada, Andhra Pradesh. The campus is located adjacent to National Highway-16 at Anakapalle, Visakhapatnam in Andhra Pradesh.

The college is approved by AICTE, New Delhi and it is permanently affiliated to Jawaharlal Nehru Technological University Kakinada, Andhra Pradesh.

Our Institute is accredited by NAAC in 2017 for a period of 5 years.

ABOUT THE IQAC

Quality enhancement is a continuous process, the IQAC become a part of the institution's system and work towards realisation of the goals of quality enhancement and sustenance.

The prime task of the IQAC is to develop a system for conscious, consistent and catalytic improvement in the overall performance of institutions. The work of the IQAC is the first step towards internalization and institutionalization of quality enhancement initiatives. Its success depends upon the sense of belongingness and participation in all the constituents of the University. It will not be yet another hierarchical structure or a record-keeping exercise in the University.

IQAC will be a facilitative and participative voluntary system/unit/organ of the University. It has the potential to become a vehicle for ushering in quality enhancement by working out planned interventionist strategies by IQAC to remove deficiencies and enhance quality like the "Quality Circles" in industries.

SEMINAR THEME

The seminar on 'Outcome Based Education (OBE)', the structural part of OBE, and the meaning of various components of OBE have been emphasized. But, how to implement OBE in colleges and universities by the faculty was not given any importance. The faculty must be trained in formulation of learning outcomes at course level, unit level and class session level. The faculty must be trained in the Outcome-based, students-centered teaching- learning strategies and instructional design. The faculty must also be given training in the Outcome-based assessment strategies and setting assignment questions and test-paper questions with an outcome-based approach. This Programme is essentially designed to empower the faculty members with the outcome-based teaching, learning and assessment strategies. This Seminar is also unique in the sense that the morning sessions are devoted to the highly interactive lecture sessions and the afternoon sessions are devoted to provide hands-on experience to participants on formulation of learning outcomes, instructional design and question paper design. This seminar itself is designed with an 'Outcome-based and participant-centered' approach.

OBJECTIVES SEMINAR

For newly-recruited faculty members, Intensive Teaching Workshops are to be arranged to explain the teaching requirements and general information of the programme. Speakers who expertise in IQAC from other institutions or senior academic staff from academic departments invited to give seminars and share their experience.
