

## List of Green Club Activities

S.No.	Name of the Activity	Month and Year of the activity	Number of participants	Page No.
1	Workshop on Seed Balls	14/10/2020	50	1-4
2	Ban on Single use plastic in India	03/12/2020	146	5-8
3	Composting - Nurture the soil	05/12/2020	98	9-12
4	Alternate fuels for pollution free environment	16/12/2020	47	13-16
5	Eco quiz Contest	25/01/2021	200	17-22
6	Plant for the Planet Programme	21/03/2021	100	23-26
7	Essay Writing Competition on Single use plastic	03/04/2021	200	27-33
8	Sustainable Infrastructure and Green Buildings	12/07/21	146	34-43
9	Plantation of fruit saplings	20/07/21	119	44-48
10	Citizen's Role in environmental Protection	21/07/21	174	49-59
11	Green with Envy	25/07/21	109	60-66
12	Plastic waste management rules and their amendments	10/12/2021	74	67-70
13	Workshop on Trash to Wow - garden beautification with Trash	22/12/21	130	70-76

## Workshop on Seed Balls

**Date:** 14/10/2020

**Zoom:** Online

Seeds are considered as the beginners of life on this planet. Their mode of dispersion may vary from being manually by humans, while some carried away by agents like birds, animals, air or water. Seed balls are designed to be disseminated in a controlled manner, resulting in the emergence of new plants. This event explains the importance into seed balls in depth, including what they are, how to prepare them, how they germinate, what they are used for, and some interesting facts about them. They are one of the most simple and long-lasting methods of cultivating plants in a way that allows for a longer period of time between sowing and harvesting.

Seed balls are also the best and most convenient option for individuals with achy backs to disperse seeds. The Green club coordinator has given a call to the students to prepare seed balls and the students have actively participated in the event. This event was supported by Green club coordinator Dr K Sirisha.

## **Ban on “SINGLE USE PLASTIC IN INDIA”**

**Date: 3/12/2020**

**VENUE: B 22 classroom**

Plastics are used only once before they are thrown away or recycled. These items are things like plastic bags, straws, coffee stirrers, soda and water bottles and most food packaging. We produce roughly 300 million tons of plastic each year and half of it is disposable! World-wide only 10-13% of plastic items are recycled. The nature of petroleum based disposable plastic makes it difficult to recycle and they have to add new virgin materials and chemicals to it to do so. Additionally there are a limited number of items that recycled plastic can be used. Petroleum based plastic is not biodegradable and usually goes into a landfill where it is buried or it gets into the water and finds its way into the ocean.

Department of BSH has conducted a essay writing contest where in 71 students have participated in the event from different branches by following all the COVID norms. After the competition, the best 3 were announced as Winners and Runners and these were felicitated with gifts.

## Composting - Nurture the Soil Naturally

**Date:** 5/12/2020

**Venue:** VIIT Campus

Every year 5<sup>th</sup> December is celebrated as the World Soil Day to raise awareness and focus on the importance of healthy soil. Composting is a way of nurturing the soil naturally and this is the need of the hour. The theme of this year is “Keep Soil Alive, Protect Soil Biodiversity”. With this theme as an agenda, the Green club along with ECE department have initiated a lecture on “Composting – a healthy way to dispose your kitchen waste”.

The lecture was conducted on 5/12/2020 in the Dharitri block seminar hall in the morning session. The HoDs of all the departments took part in this event.

The participants have actively implemented the words they heard into actions after reaching their homes.

## **ALTERNATE FUELS FOR POLLUTION FREE ENVIRONMENT**

**Date:** 16/12/2020

**Venue:** VIIT Campus

Department of Mechanical Engineering, VIIT Campus organized the virtual workshop on **ALTERNATE FUELS FOR POLLUTION FREE ENVIRONMENT** on 16/12/2020. To conduct the event we invited Dr. ValaparlaRanjith Kumar as a guest speaker from Mechanical Engineering Department, CMR Engineering College, Hyderabad.

The main objective of the workshop was to educate the students regarding the usage of conventional fuels for domestic and industrial purpose and its emissions effects on environment.

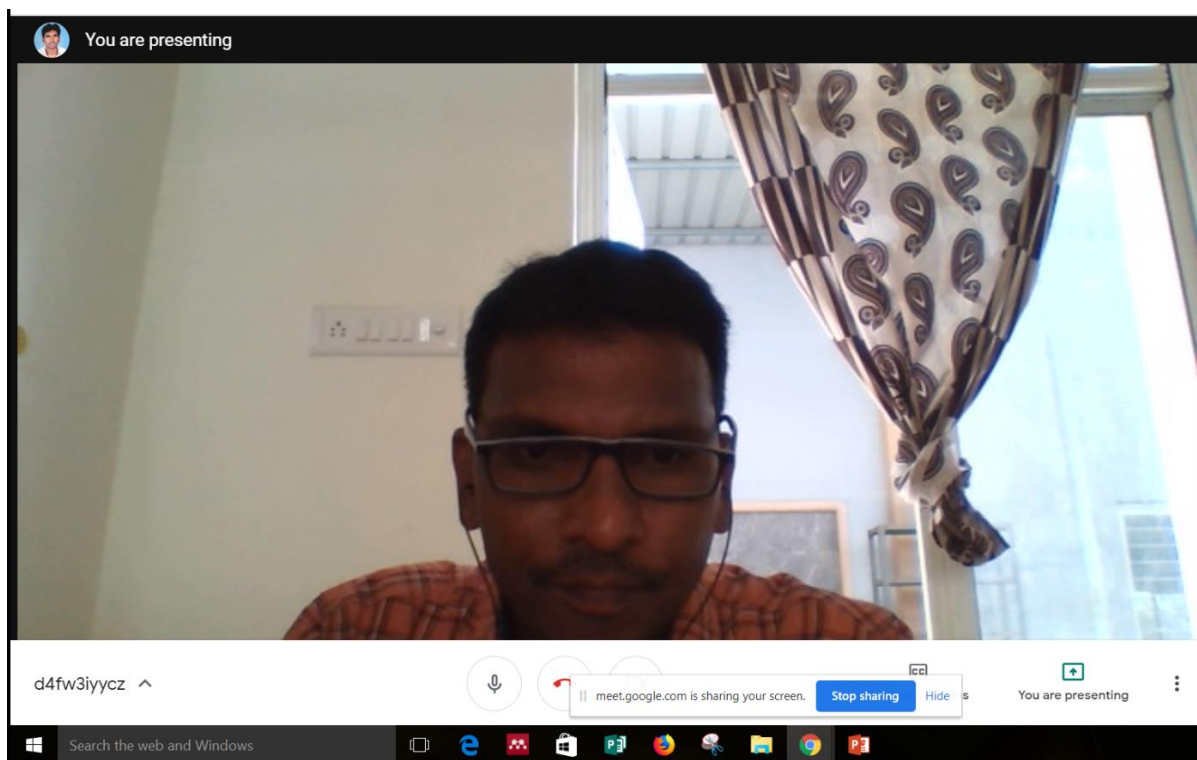

### **Brochure:**

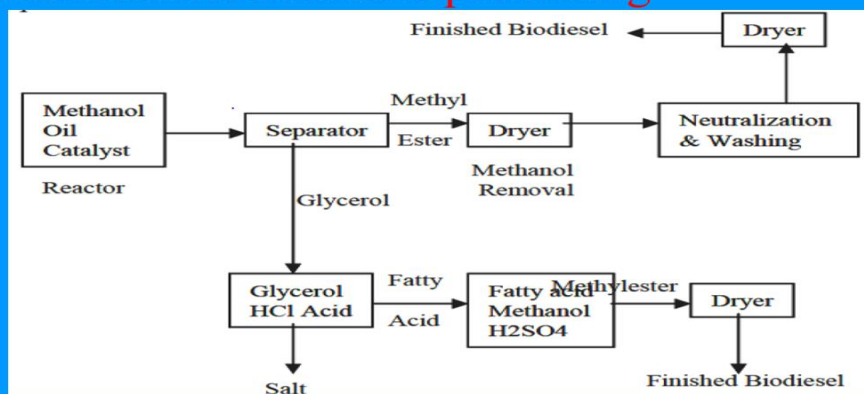

## Participant list:

## Eco quiz Contest

**Date:**25/1/2021

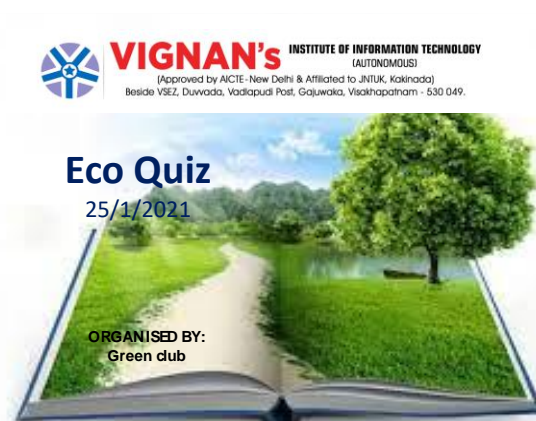

**Venue:** Room No.A13

Environmental awareness has become the need of the hour as it enhances critical and creative thinking skills that would the youth to become environmental conscious for their actions. The Green club in collaboration with CSE dept. have collaboratively conducted a contest on ECO QUIZ, which purely focussed on environmental concepts and issues.

There were about 200 students that have registered and they were scrutinized by written test first and further buzzer round. Finally 5 teams could make up for final round. The senior students have organized the event while the juniors have actively participated in the event.

The winners were given prizes along with a sampling by Dr V Madhusudhan Rao, Rector and Dr B Arundathi, Principal and at the event were ended with a pledge to support environmental sustenance.

## Plant for the Planet Programme

**Date:** 21/3/2021

**Venue:** VIIT campus

The United Nations General Assembly proclaimed 21<sup>st</sup> March as World Forest Day to raise awareness on the importance of forest for the very sustenance of life on the planet Earth. As Forest play very prominent role in maintaining the ecosystem at equilibrium, the NSS team VIIT has conducted a “Plant for the Planet Programme” where in the students have actively participated in the plantation program in the Campus. In this event Dr B Arundathi, Principal VIIT has initiated and praised the thought of the students to include more useful plantation within the campus. Dr P Sekhar, HoD –EEE has also taken part in this event along the department students and faculty. About 50 fruit and flowering sampling were planted as a part of this event. The fund needed for this event was purely donated by the students itself. This initiative was well appreciated by the management and staff. The NSS team which include about student volunteers along with the NSS PO has supported the event.

## **Report on Event**

# **SINGLE USE PLASTIC**

Organized by  
**Department of BS&H**

**VENUE: Seminar Hall, Dharithri Block**

### **Abstract:**

Single-use plastics, or disposable plastics, are used only once before they are thrown away or recycled. These items are things like plastic bags, straws, coffee stirrers, soda and water bottles and most food packaging. We produce roughly 300 million tons of plastic each year and half of it is disposable! World-wide only 10-13% of plastic items are recycled. The nature of petroleum based disposable plastic makes it difficult to recycle and they have to add new virgin materials and chemicals to it to do so. Additionally there are a limited number of items that recycled plastic can be used. Petroleum based plastic is not biodegradable and usually goes into a landfill where it is buried or it gets into the water and finds it's way into the ocean. Although plastic will not biodegrade (decompose into natural substance like soil,) it will degrade (break down) into tiny particles after many years. In the process of breaking down, it releases toxic chemicals (additives that were used to shape and harden the plastic) which make their way into our food and water supply. These toxic chemicals are now being found in our bloodstream and the latest research has found them to disrupt the Endocrine system which can cause cancer, infertility, birth defects, impaired immunity and many other ailments. We produce hundreds of millions of tons of plastic every year, most of which cannot be recycled. It's obvious that we need to use less plastic, move towards environmentally sustainable products and services and come up with technology that recycles plastic more efficiently.

## **Single Use Plastic**

Held on 3<sup>rd</sup> April 2021 at Seminar Hall.

### **About the event**

Approximately 300 students have participated in the event from different branches by following all the COVID norms. After the competition, the best 3 were announced as Winners and Runners and these were felicitated with gifts.

### **Agenda:**

To make students aware of their consumptions related to single use plastics.

### **Objective of the event:**

To bring awareness among the students about Single Use Plastic and to also make them know how harmful the plastic cause to the future generations

### **Summary of the event:**

Unlike metals, plastics do not rust or corrode. Most plastics do not biodegrade, but instead photo degrade, meaning that they slowly break down into small fragments known as micro plastics. The fragmentation of large plastic items into micro plastics is common on land such as beaches because of high UV irradiation and abrasion by waves, while the degradation process is much slower in the ocean due to cooler temperatures and reduced UV exposure. The assertions made in this document refer mostly to fossil-derived plastics and not to plastics of biogenic origins, although reference to the latter group is made in section. Single-use plastics, often also referred to as disposable plastics, are commonly used for plastic packaging and include items intended to be used only once before they are thrown away or recycled. These include, among other items, grocery bags, food packaging, bottles, straws, containers, cups and cutlery. The main polymers used to manufacture single use plastic items and indicate their most common applications.

### **Outcome of the event:**

Finally, students have come to know that Plastic is harmful to environment and burning of plastic in the open-air leads to environmental pollution due to the release of poisonous chemicals.

## **REPORT ON TECHNICAL SEMINAR**

### **Sustainable Infrastructure and Green Buildings**

**Organized by**

**Department of CE**

#### **Abstract**

The need of reducing greenhouse gases and to implement sustainable development in the construction sector has given birth to the green buildings. Green building is a building designed and constructed using the process and resources that will not compromise with the health of the environment as well as building's occupants, workers, general public and future generations. Due the raising awareness for issues like global warming now government and people are moving for sustainable building products and practices. However, the rate of adoption to those practices is very slow.

Building a green building is not just a matter of assembling a collection of the latest green technologies or materials. Rather, it is a process in which every element of the design is first optimized and then the impact and interrelationship of various different elements and systems within the building and site are re-evaluated, integrated, and optimized as part of a whole building solution. By blending the right mix of green technologies that cost less with green technologies that cost the same or slightly more, it is possible to have a very green building project that costs the same as a conventional one. Often the key to a cost-effective green building and site design lies within the interrelationships and associated cost and performance trade-offs that exist between different building systems.

## **TECHNICAL SEMINAR ON**

### **Sustainable Infrastructure and Green Buildings**

Held on 12<sup>th</sup> July 2021 through virtual mode

#### **About the event**

On July 12, 2021, from 10:00 A.M. to 2:00 P.M., the CE department hosted a technical seminar on **Sustainable Infrastructure and Green Buildings**), considering its importance in civil engineering with the present trends in construction methodologies. It was conducted through virtual mode as part of Green **Club** initiative. Few Students from the final year of civil department, having gained good knowledge through their internship program gave presentation over diversity in green house buildings and its importance in civil engineering and Mr. M Santhosh Kumar has shared his view on their presentations and gave his valuable comments, which was followed by a vote of thanks by the Head of the Department. This technical seminar had a total of 147 participants, including faculty and students.

Panchayat Raj Engineering

**DATE & TIME**  
12<sup>TH</sup> July 2021 (Monday) 10:00AM TO 02.00PM

**Coordinator**  
**Mr. M Padmakar**, Asst. Professor  
HoD-Civil  
**Siriki S S Nitish**, Asst. Professor, CE  
**K. Srinivas**, Asst. Professor, CE

**ORGANISED BY:**  
GREEN CLUB AND DEPARTMENT OF CIVIL ENGINEERING

### **Objective of the event**

1. Systematic review on barriers to green building practices adoption in India
2. To device a comprehensive methodology to reduce the development footprint in buildings by introduction of green construction schemes in the construction practices
3. Identification of various aspects pertaining to development footprint
4. Understanding difficult and complex issues of sustainable-Buildings
5. To understand the various materials in Green Buildings

### **About the Speaker:**

**Mr. M Santhosh Kumar**, Assistant Executive Engineer, Panchayat raj Engineering Department, Paderu.

**Anusha Tantapureddi, Pavan Kumar Samal, Kolli Kavyashree, D Pavan Sai, Kona Chaitanya and R Sai Vihar**, Final Year, Department of Civil Engineering, Vignan's Institute of Information Technology, Duvvada, Visakhapatnam. They have gained sound knowledge on the green buildings and sustainable infrastructure through their internship program in various companies involving Govt. projects and International Design works.

### **Summary of the Technical Seminar**

Due the raising awareness for issues like global warming now government and people are moving for sustainable building products and practices. However, the rate of adoption to those practices is very slow. lack of information as a result of insufficient education and reliable research on Green Buildings not only makes it difficult to acquire expert Green Buildings knowledge, but also decreases public awareness on Green Buildings. The high initial investment and limited financial resources and budget acts as a barrier to the adoption of green building. Green building costs higher compared to conventional buildings, which includes higher labor costs, costs related to installations that conform to design specifications like solar heating appliances, ground-source heat pumps etc., Despite the importance of incentives in encouraging Green Buildings adoption among stakeholders, they are lacking in many countries and that this 12 affects Green Buildings adoption. It is very important to create awareness in order to eradicate this barrier. Mandatory Green Buildings codes and regulations are lacking in India for Green Buildings adoption.

### **Outcome of the technical seminar**

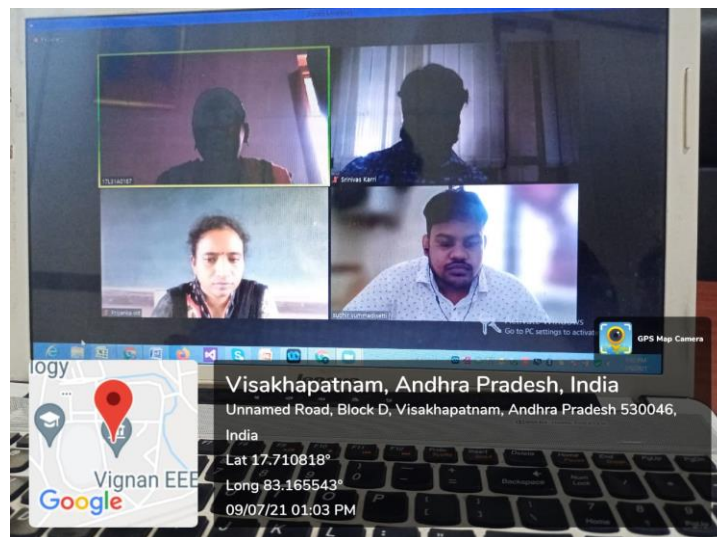

1. To be responsible towards the mother nature.
2. Try to save every energy source at least minute level.

3. Students could understand the concept nature through GITA slokas.
4. Student learnt their responsibilities towards nature from short stories of famous personalities.
5. Could learn how to manage waste and bring best from it.

### **Glimpses from the Webinar**

### **Presentation by R Sai Vihar on Hazardous Waste Management**

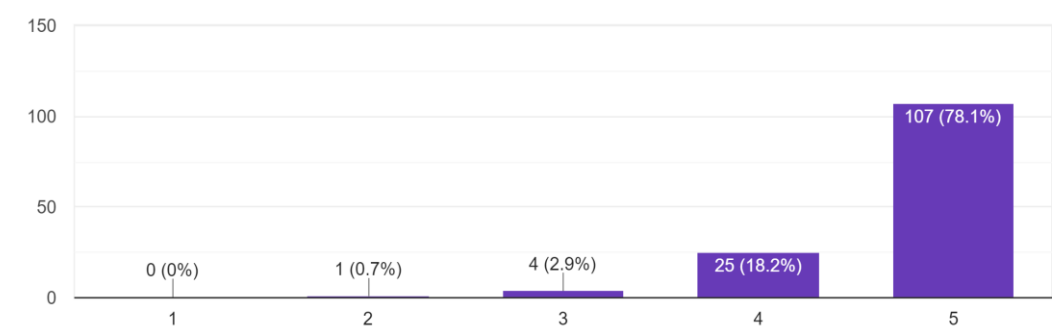

### **Interaction of Students and Faculty with the speakers**

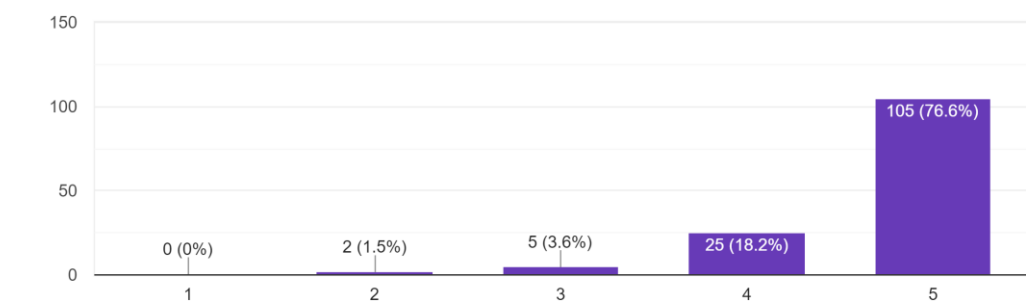

**Sponsor for the event:** Vignan's Institute of Information Technology (A)

**Feedback of the event:**

How intersting was the technical seminar?  
137 responses

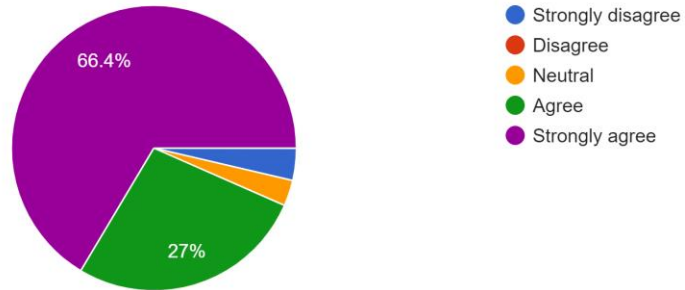

Is the Speaker interactive and Interseting?  
137 responses

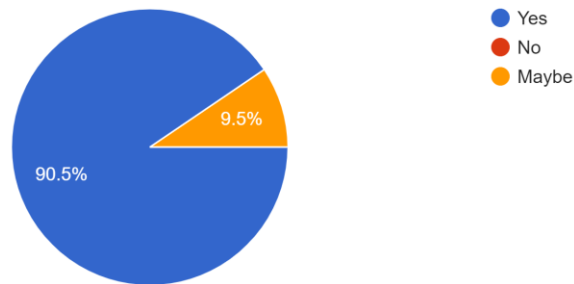

### The content of the Seminar is Useful?

137 responses

### Overall, were you satisfied with the quality of the seminar and were you able to see and hear presentations clearly

137 responses

### Any other Comments

Excellent  
No comments  
Nice session  
.  
Excellent  
.  
Anusha has presented well  
Have understood good Green construction practices  
Moderately interactive session  
Good knowledge  
Nothing to say  
Informative session  
Off-line session at the college would have been better  
Required more  
Require more sessions like this  
Very good session.  
Nil

## **REPORT ON EVENT**

### *Plantation of fruit plant saplings*

#### **Organized by**

***Department of Information Technology and Green Club***

***Date and time*** : 20<sup>th</sup> July-24<sup>th</sup> July 2021

***Venue*** : VIIT Premises

#### **About the event:**

With this fast moving and technologically advanced world, people have completely forgotten the most vital thing for their existence. Trees are the lungs of the earth. But, with the increasing population and land requirement, the practice of deforestation and felling of trees is being practiced in an uncontrollable manner. They are forgetting that these trees are reasons for our lives and without them the whole earth will one day turn into a graveyard. Hence every individual on the earth has to take the initiative to plant trees that protects the mankind.

#### **Agenda :**

Plantation of fruit plant saplings in the premises of VIIT and other areas keeping in view of Covid-19 pandemic.

#### ***Objectives of the event:***

One Week fruit sapling Plantation Program was held in the campus with the aim to keep the campus clean and green. The objective of the program was to create awareness among the students regarding the importance of ecology and the natural environment

#### ***Outcome:***

All the faculty and students were highly energetic to plant the trees in their own premises and made the promise to up bring the plants in a greener manner.

#### ***Summary:***

Every individual should know the importance in increasing the green gases levels and saving the nature by planting the trees. The students as well as faculty should show their distinctiveness in making the entire campus green.

## **REPORT ON WEBINAR**

### **Citizen's Role in Environmental Protection**

**Organized by**

**Department of ECE and Green Club**

#### **Abstract**

Environmental protection is the practice of protecting the natural environment by individuals, organizations and governments. Its objectives are to conserve natural resources and the existing natural environment and, where possible, to repair damage and reverse trends. Due to the pressures of overconsumption, population growth and technology, the biophysical environment is being degraded, sometimes permanently. This has been recognized, and governments have begun placing restraints on activities that cause environmental degradation. Since the 1960s, environmental movements have created more awareness of the multiple environmental problems. There is disagreement on the extent of the environmental impact of human activity, so protection measures are occasionally debated.

#### **WEBINAR ON**

#### **Citizen's Role in Environmental Protection**

Held on **21<sup>st</sup> July 2021** through virtual mode

#### **About the event**

On July 21, 2021, from 10:00 A.M. to 12:30 A.M., the ECE department hosted a webinar on **Citizen's Role in Environmental Protection** it was delivered through virtual Media part of **Green Club** initiative. The speaker of this webinar **Dr.K V S G Murali Krishna**, prof. Civil Engineering Department, JNTUK was speaker of the programme. The brief and to-the-point webinar discussed roles and responsibilities as a human and citizen to protect the mother earth. This webinar had a total of 120 participants, including faculty and students.

**VIGNAN's**

Re-accredited by NAAC with 'A++' Grade (CGPA of 3.41/4.00)  
DUVVADA, VISAKHAPATNAM

## WEBINAR ON CITIZEN'S ROLE ON ENVIRONMENTAL PROTECTION

**SPEAKER**

**Prof. KVSG MURALI KRISHNA**  
Professor of Civil Engineering & Former Principal  
JNTUK Narasaraopet, Director Green Campus Initiatives  
JNTUK Kakinada, Former Member SEAC MoEF Govt. of India

**Date & Time**

21 <sup>st</sup> July 2021 (Wednesday)	10:00AM TO 12:00PM
--	--------------------

**Prof.K.MURALI KRISHNA**  
HoD-ECE

**Coordinators**  
Mrs.Ch.SHRAVANI, Asst.Professor-ECE  
Mr.A.S.DAKSHINA MURTHY, Asst.Professor-ECE

**Organised by: GREEN CLUB &  
Department of ELECTRONICS AND COMMUNICATION ENGINEERING**

### Objective of the event

1. To improve the conservation of natural resources.
2. Inculcate saving of energy at a minute level in fresh engineers.
3. To ensure natural environment is wisely used and benefit the future generations.
4. To improve the quality of living through organic methods.

### About the Speaker

**Dr. KVSG Murali Krishna**, Professor of Civil Engineering Department, Former Principal JNTUK Narasaraopet, Director Green Campus Initiatives JNTUK, Former member SEAC [State Experts Appraisal Committee for A.P.], Expert for Technical & Economic Appraisal HPCSAC [High Power Committee Swachha Andhra Corporation], Govt. of AP. He authored total Number Books : 24. Published 80 papers National, International Journals and Conferences. Involved in 16 various projects which includes Govt. of Andhra Pradesh Projects even.

### Summary of the Webinar

These days people are more occupied with occupations and other chores. Usage of electricity, fuels has increased to huge amount where they almost Came to distinct. Speaker gave a clear idea to the students regarding their responsibility towards the climate and mother nature. Her

gave suggestions in terms of Bhagavat Gita slokas to enlighten students. Overall he showed some of the example programs he practiced in his premises for the protection of environment.

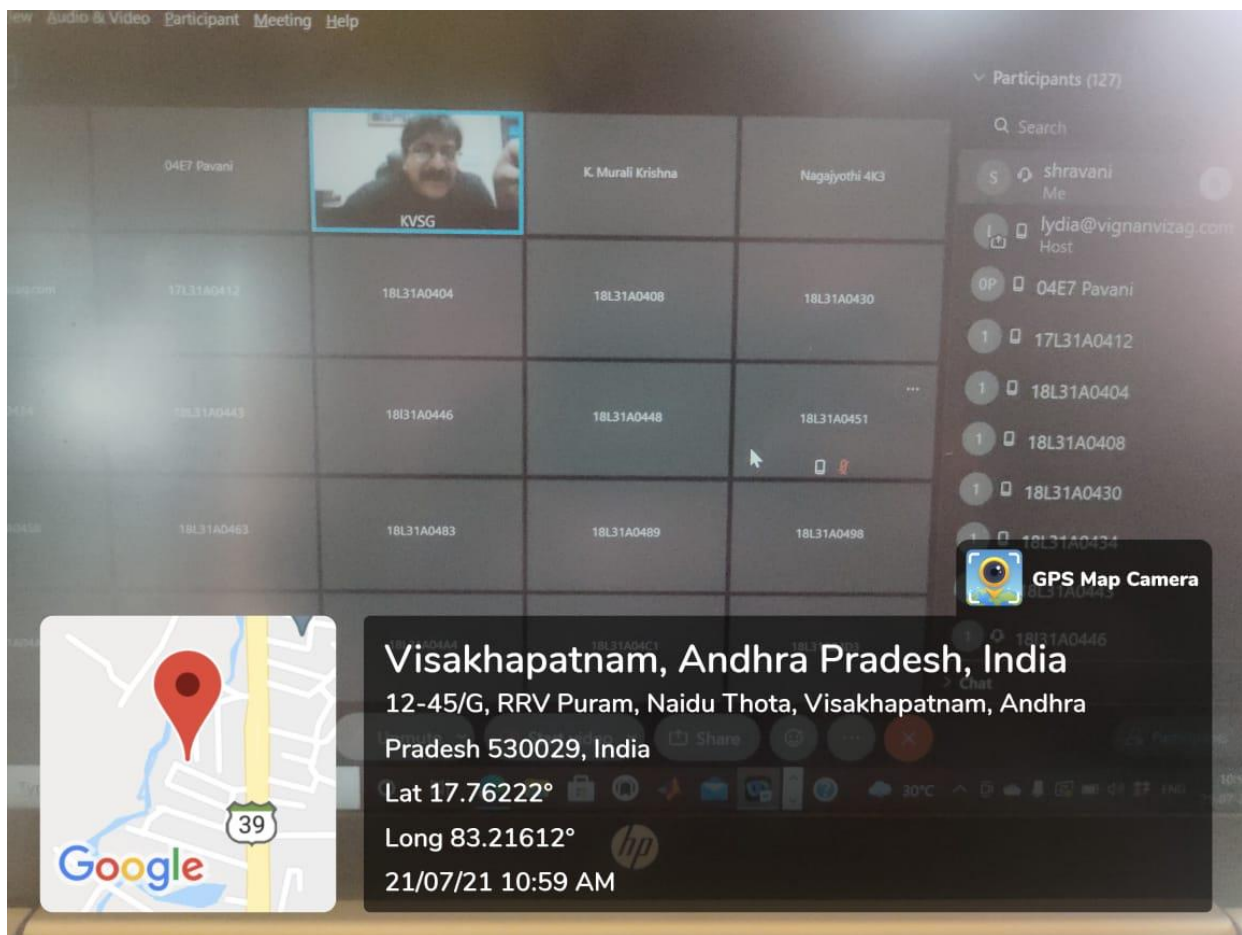

### **Outcome of the webinar**

1. To be responsible towards the mother nature.
2. Try to save every energy source at least minute level.
3. Students could understand the concept nature through GITA slokas.
4. Student learnt their responsibilities towards nature from short stories of famous personalities.
5. Could learn how to manage waste and bring best from it.

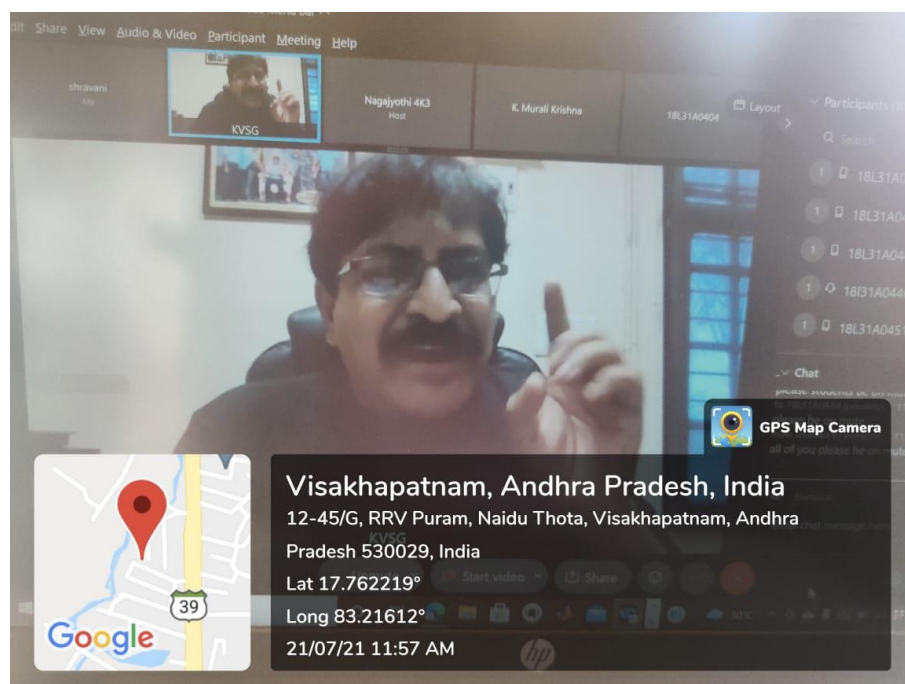

### **Glimpses from the Webinar**

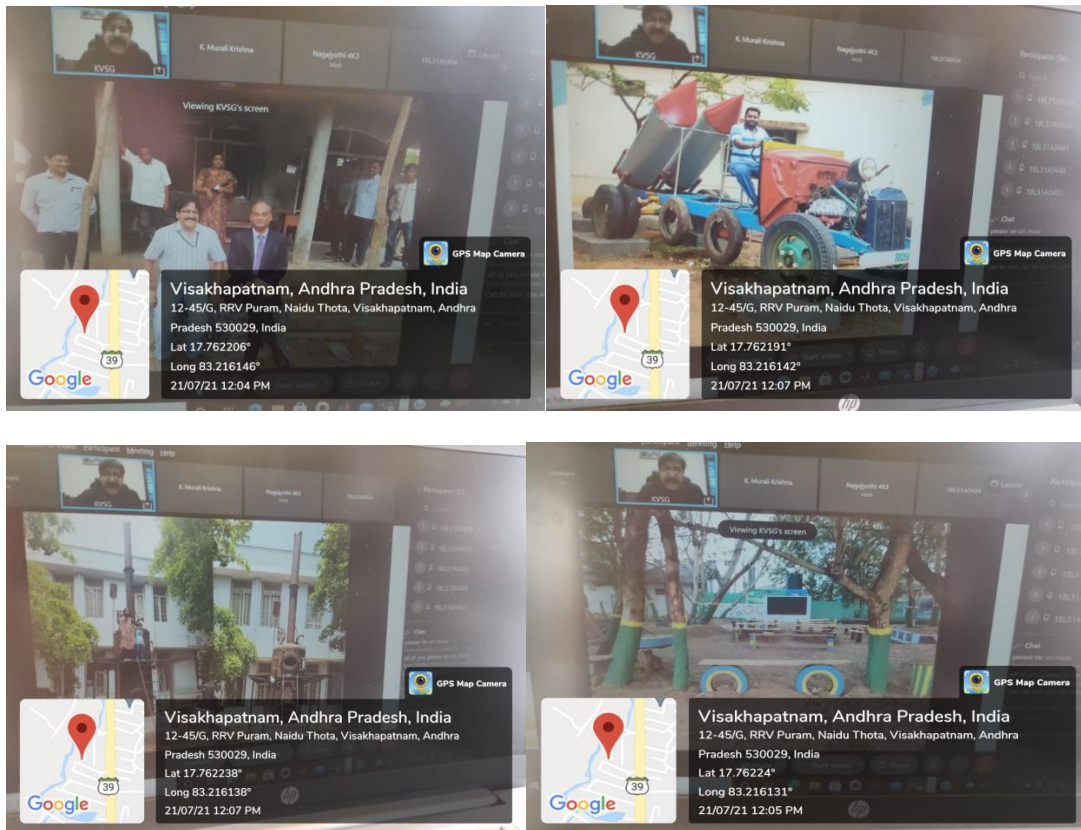

**The speaker of this webinar Dr.M.V.K.N Kumar**

## Introduction to Citizen's Role in Environmental Protection

## Examples from Bhagavat Gita

## Some example programs from Speaker

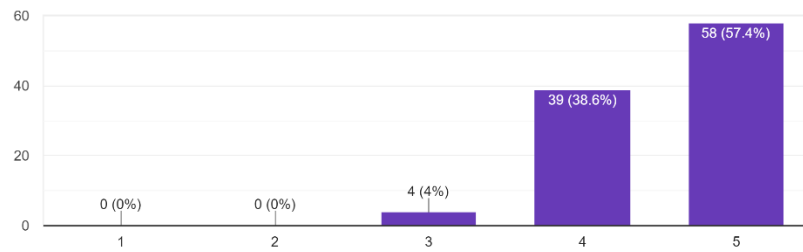

## Interaction between students and speaker

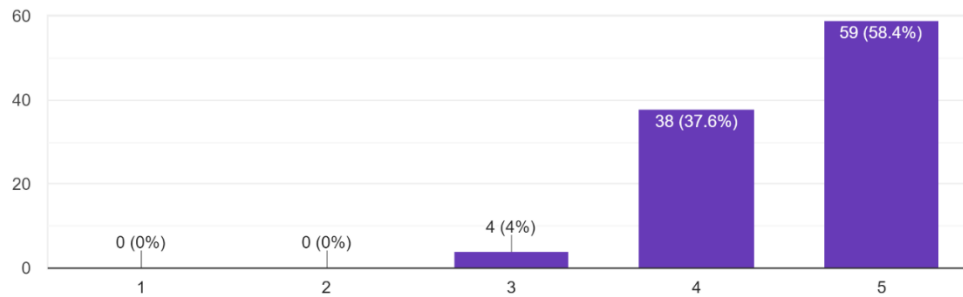

## Sponsor for the event: Vignan's Institute of Information Technology (A)

### Feedback of the event:

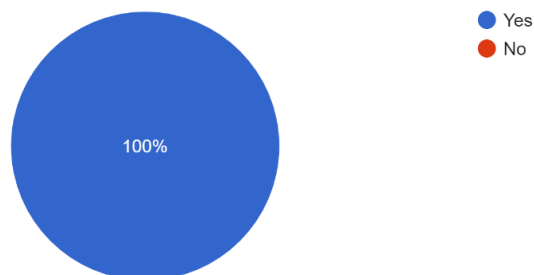

Overall, how interesting was the webinar?  
101 responses

Is the speaker interactive and interesting  
101 responses

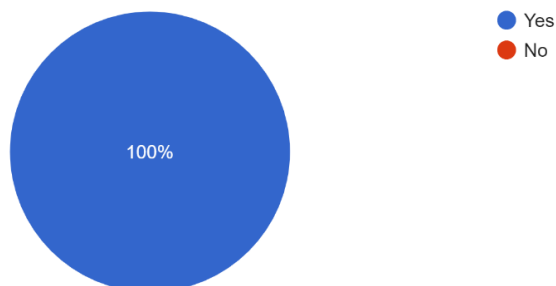

The content of the webinar is useful?  
101 responses

Overall, were you satisfied with the webinar quality and were you able to see and hear the presentations clearly?

101 responses

### Any other Comments

1. Good
2. EXCELLENT
3. The webinar was really good.the sanskrit quotations said by the speaker has an immense meaning in it .expecting one more webinar like this.
4. We want live session at college
5. Nothing its really interesting session
6. The session was quite good and is very useful
7. Jai shree ram
8. This type of webinar would help us to improve our selves
9. Very nice
10. Good thanks for this session.
11. Good for students now a days of society
12. Very good session
13. It is a interactive session .I got lot information and principles from the presentation. It was quite interesting session on eco system. So I hope this will continue till my future .
14. The webinar was good and interesting.
15. No suggestions
16. Thank you so much for motivating us.
17. Very motivated
18. Awesome webinar. Very interesting and informative. I loved it a lot
19. Best opportunity
20. Very interesting session with lots of useful information

## **REPORT ON WEBINAR**

### **Green with Envy**

**Organized by**

**Department of ECM**

### **Abstract**

"Green with Envy" means "Going green" or to pursue knowledge and practices that can lead to more environmentally friendly and ecologically responsible decisions and lifestyles, which can help protect the environment and sustain its natural resources for current and future generation.

"Green" refers to a world in which natural resources, including oceans, land, and forests, are sustainably managed and conserved to improve livelihoods and ensure food security. It's a world in which healthy ecosystems increase all the economic returns from the activities they support. Growth strategies are focused on overall wealth rather than GDP as it is currently measured. Governments pursue regulations that encourage innovation, efficiency, sustainable budgeting, and green growth. Biodiversity is protected as an economically critical resource. In this world, good policies enable the private sector to use natural resources sustainably as part of good business, creating jobs and contributing to long-term growth.

### **Webinar On**

### **Green with Envy**

Held on **25<sup>th</sup> July 2021** through virtual mode

### **About the event**

On July 25, 2021, from 11:00 A.M. to 12:00 P.M., the ECM department hosted a webinar on "**Green with Envy**". It was conducted through virtual mode as part of Green Club initiative. Mrs.P.Sumanjili has shared her views on the positive effects on the environment from going green and gave her valuable comments, which was followed by a vote of thanks by the Head of the Department. This webinar had a total of 200 participants, including faculty and students.

## WEBINAR ON GREEN WITH ENVY

### SPEAKER

Mrs. SUMANJALI PARIMI

Assistant Professor  
Department of Civil Engineering, Raghu Institute of Technology

**Date & Time**

25<sup>th</sup> July 2021 (Sunday)

11:00AM TO 12.00PM

Mrs. R. Uma Maheswari

Assoc. Professor  
HoD-ECM

Coordinators

Mrs. G.Indira Devi

Asst.Professor-ECM

Organised by: GREEN CLUB ACTIVITY &

Department of ELECTRONICS AND COMPUTER ENGINEERING

### Objective of the event

1. To maintain social progress and equality
2. To understand the environmental protection, conservation of natural resources and stable economic growth.
3. Conserve and enhance our resource base, by gradually changing the ways in which we develop and use technologies

### About the Speaker:

Mrs. **P. Sumanjali**, M.E., (Ph.D). Assistant Professor, Civil Engineering Department, RIT. Pursuing PhD at Andhra university Visakhapatnam. Having 10 years of experience in the field of teaching.

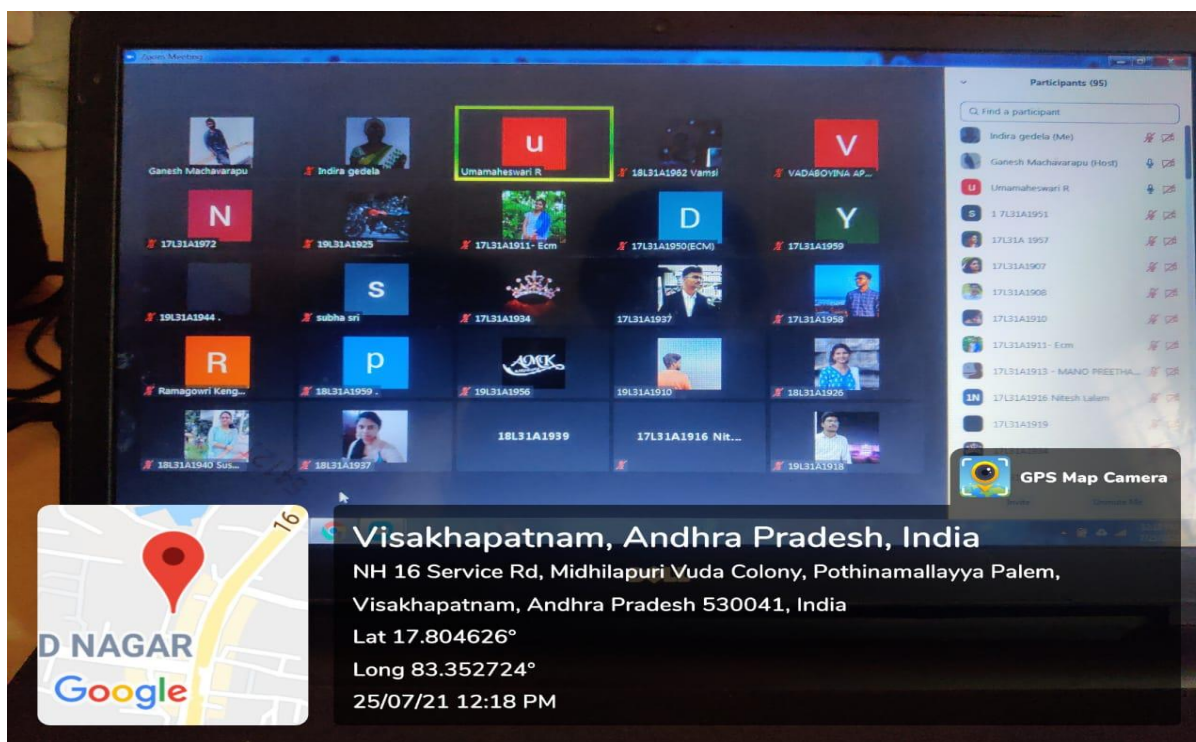

## Summary of the Webinar

Realizing that every action and every decision we make is either going to help or harm the environment. We knew that it was going to cause a little inconvenience but we knew it would save money in the long run. 'Green with Envy' has now become a common phrase among people nowadays. Going Green means to be committed to protecting the natural resources in our environment. As awareness of man's impact on the environment is increasing, people are becoming more and more willing to practice cleaner lifestyles. Every action of ours has an impact on the environment. From the cars we drive, the food we eat, the clothes we wear and the purchases we make, they not only affect the environment, but they also show our attitude towards it. Going green does not necessarily have to involve high costs. It just requires us to make fundamental changes to our lifestyles.

## Outcome of the Webinar

1. To be responsible towards the Mother Nature.
2. Try to save every energy source at least minute level.
3. Student learnt their responsibilities towards nature from short stories of famous personalities.
4. Could learn how to manage waste and bring best from it.

## Glimpses from the Webinar

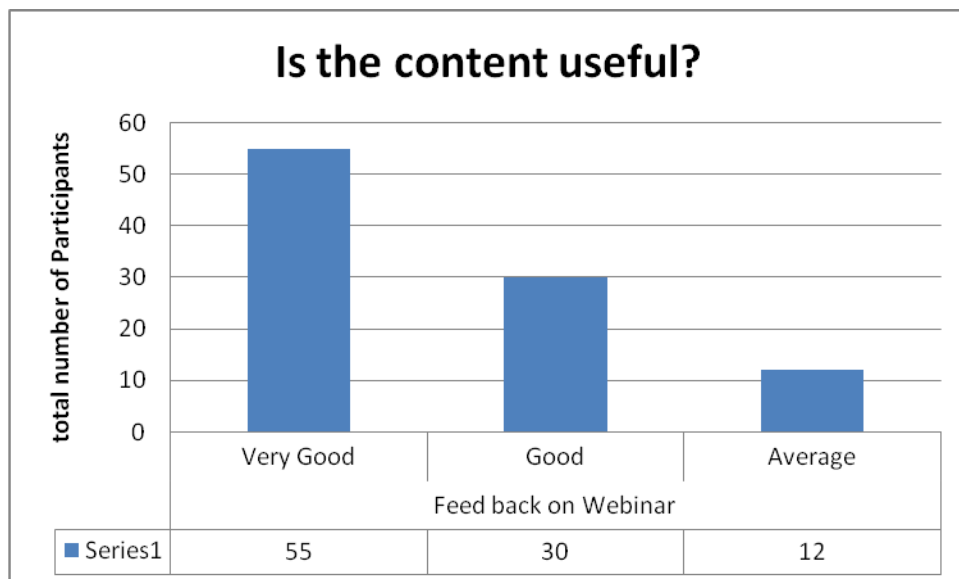

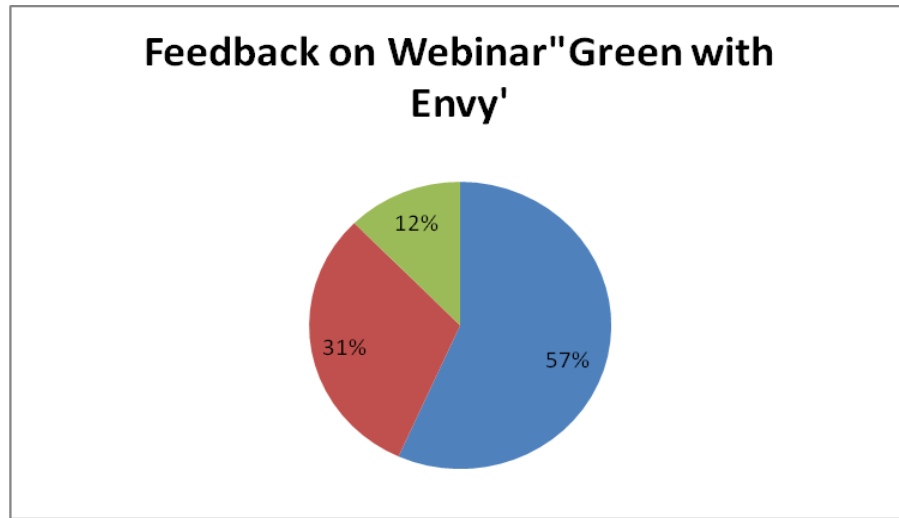

Presentation by Speaker

**Budget of the event:** NIL

**Sponsor for the event:** Vignan's Institute of Information Technology (A)

**Feedback of the event:**

### Any other Comments

1. Excellent
2. Nice session
3. Informative
4. Excellent
5. Good
6. Require more sessions like this
7. Good session but Offline would be more interactive.
8. Good
9. Useful content
10. Attractive

### Student attendance:

## **REPORT ON EVENT**

### **Presentation on “Plastic waste management rules and their amendments”**

Organized by

Department of BS&H

**VENUE: English Lab, DHARITHRI BLOCK**

Held on 10<sup>th</sup> December, 2021 in the English Lab.

#### **About the event**

As a part of Azadi ka Amrit Mahostav, the Department of Basic Sciences and Humanities has organized a Power Point Presentation on Plastic waste management rules and its amendments wherein about 20 teams have participated in the event from different branches by following all the COVID norms. After the competition, the best 3 were announced as Winners and Runners and these were felicitated with gifts.

**Agenda:** To make students aware of the impacts of plastic usage and to give them information related to plastic management rules and its amendments.

#### **Objective of the event:**

To make the students aware of the plastic waste management techniques and to acknowledge them with plastic waste management rules and their amendments.

#### **Summary of the event**

The Ministry of Environment, Forest, and global climate change has issued a notification dated 12th August 2021, in the name of Plastic Waste Management (Amendment) Rules, 2021, that aims to ban identified single-use plastic items, having low utility and high littering

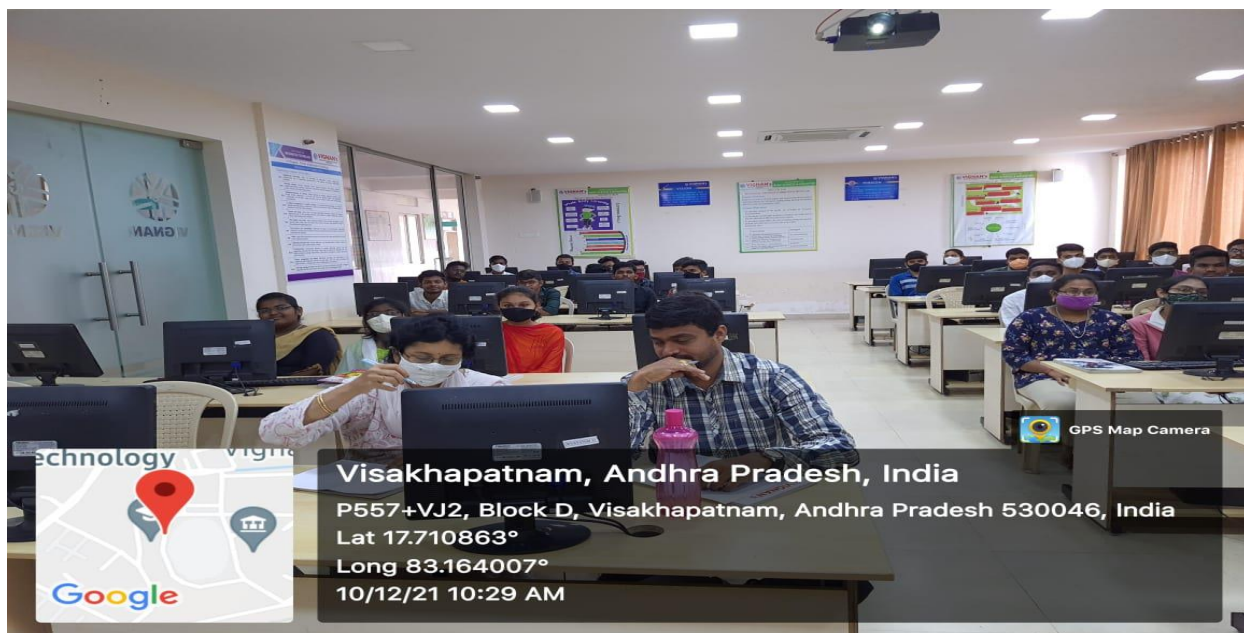

potentials, by the year 2022. Post amendment rules, the prevailing entities which are engaged in business activities involving plastic/ plastic items will need to reduce and

subsequently eliminate the marketing of single-use plastic commodities. Further, there also are some important amendments concerning marking or labeling and thickness of plastic carry bags. An equivalent is summarized within the present article. Apart from knowing the amendments in the present rules, the contest helped the students to present their views on the plastic waste minimization needs and techniques.

### Outcome of the event:

This event gave the students an opportunity to present their ideas related to minimization of plastic consumption and also made them to learn some of the important features of plastic waste management rules.

## **REPORT ON EVENT**

# **A workshop on “Trash to Wow- Garden Beautification with Trash”**

**Organized by**

**Green Club**

### **About the event**

The workshop focused on designing products from the campus waste that mainly focused on plastic bottles, bottle caps and used tyres. The event started with the collection of raw material that includes the above mentioned items and ended with designing some beautiful garden planters and our institute logo.

### **Agenda:**

To make the students aware of the impacts of plastic usage and to give them information on methods to reuse them for a better and beautiful future.

### **Objective of the event:**

To make the students aware on simple waste up-cycling methods.

### **Summary of the event**

The workshop started with the very basic level, where in the students were made to collect the waste plastic bottles within the campus by taking proper precautions (that include wearing gloves). Further these bottles were cleaned using dettol solution and then left to dry in the sun for two days. The same procedure is carried out the tyres too. Further the students have used their creative ideas to design different structures that included the following:

1. Well shaped planter made out of used bus tyres and plastic bottles
2. Minion planter made out of used tyres and plastic bottles
3. Snow man planter made out of used tyres and plastic bottles

4. Logo of our Institute made out of used plastic bottle and soda bottle caps.

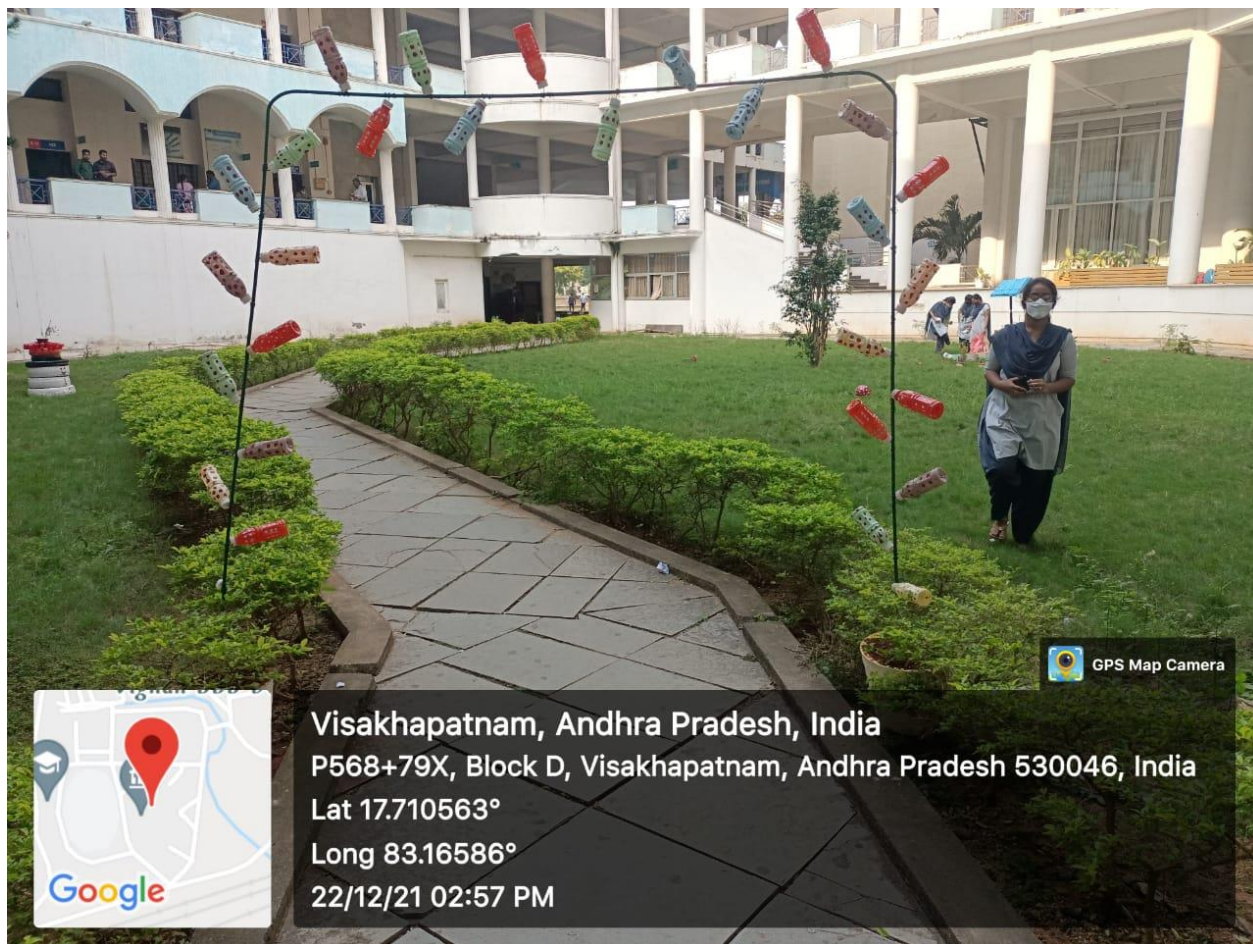

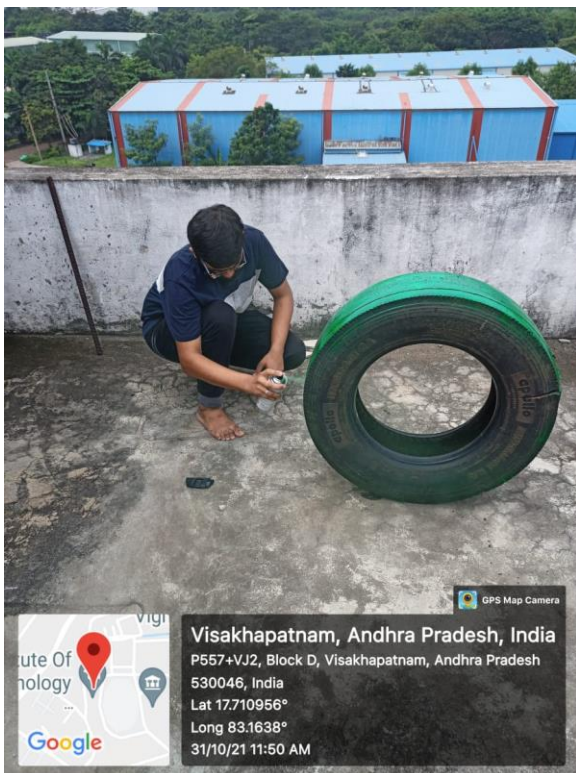

The workshop turned out to be very lively with the active participation of the students from all years.

### Outcome of the event:

This event gave the students an opportunity to present their ideas related to up cycling of waste.
